# International Consultancy Services

The RCGP has undertaken International Consultancy Services for academic and government institutions and organisations for over 25 years.

Such projects may range from the assessment of existing medical training and examination frameworks in medical schools and universities, to postgraduate medical training curriculum enhancement to ensure it is in line with international medical training standards.

The RCGP relies on a wide network of experienced RCGP medical educators, examiners and an in-house specialist project management team. The two teams will work with you to understand and capture your specific needs, and advise you on the most suitable consultancy service for your organisation. The initial consultation (via email or phone) is non-committal and free of charge. Our projects would be carried out at your site with a dedicated team of clinicians and managers. We will work with you to ensure all key data and information is gathered and properly analysed.

Regardless of the consultancy service you require, you will receive a final report tailored to the needs of your organisation. It will give you the opportunity to make an informed decision on the right trajectory needed to enhance local clinical capacity-building, medical training and assessment standards.

## Types of International Consultancy Services

- » Training needs analysis.
- » Curriculum and examination accreditation analysis.
- » MRCGP[INT] accreditation pathway.
- » Primary healthcare policy advice.
- » Participation in health system strengthening projects.
- » Strengthen continuing professional development programmes.

## Aims

- » Promote family medicine as a speciality in your country.
- » Improve the quality of family medicine training.
- » Meet international medical training standards.
- » Achieve MRCGP[INT] exam accreditation.

## Benefits

- » Access to 'gold-standard' international family medicine development.
- » Advice and guidance from a team of experienced international experts who will assist you in every aspect of the consultancy service.
- » A clear set of recommendations specifying your development needs.
- » A bespoke timeline and action plan illustrating how you might achieve your aims.
